PROFESSIONAL EXPERIENCE

Sr. Android Developer | Ramz Al Oula, Riyadh, Saudi Arabia **Jul 2024 – June 2026**

- Develop and optimize high-performance mobile e-commerce features using Kotlin, Jetpack Compose, Coroutines, Flow, and modern Android architecture.
- Contribute to scalable app architecture and performance improvements across customer-facing retail flows.

Team Lead / Sr. Android Developer | Webandcrafts, Thrissur, India **May 2022 – May 2024**

- Led Android development using Kotlin and Jetpack Compose while coordinating tasks in an Agile-Scrum environment.
- Ensured architectural consistency, code quality, and timely delivery across multiple features and releases.

Android Developer | Purpose Code Software Solutions Pvt Ltd, Calicut, India **Feb 2019 – Jan 2022**

- Maintained and enhanced existing Android apps while developing new features and new applications from scratch.
- Improved app performance and maintainability using Java, Kotlin, and XML-based UIs.

Android Developer | Mentor Performance Rating Pvt Ltd, Calicut, India **Mar 2016 – Feb 2019**

- Built the company's flagship Android app from scratch as the sole developer, covering design, development, and Play Store launch.

SELECTED PROJECTS

Caribou Coffee Kuwait ([Play Store](#))

- Built a mobile ordering app with menu browsing, customization, secure payments, pickup, curbside service, and store locator.
- Used MVI and Jetpack Compose for a scalable and maintainable codebase.

Jumbo Souq ([Play Store](#))

- Contributed to Qatar's electronics and appliances marketplace app with Jetpack Compose, MVI, multi-module architecture, and GraphQL integration.
- Supported express delivery, returns, rewards, analytics, push notifications, and crash monitoring.

Lulu Shopping ([Play Store](#) | [AppGallery](#))

- Developed retail Android features for browsing, cart, checkout, HMS integration, encrypted payments, and offline sync.
- Improved user analytics using Firebase, Google Analytics, and AppsFlyer.

IKEA GCC ([Play Store](#))

- Implemented product visual search and SSO modules for multiple GCC markets.

Radio Mango ([Play Store](#))

- Developed a multi-platform streaming app with Media3/ExoPlayer, Google Cast, Android TV, Android Auto, and Wear OS support.

Purposecolor ([Play Store](#))

- Built an AI-driven behavioral tracking app with FFmpeg processing, Room-based offline storage, and WorkManager automation.
